

EMPOWERING THE NEXT GENERATION OF **SEMICONDUCTOR PROFESSIONALS**

The Centre for Nano Science and Engineering (CeNSE) at the Indian Institute of Science (IISc) is pleased to announce the launch of the Foundational Workshop on Semiconductor Manufacturing. This comprehensive program is meticulously designed to equip professionals and academicians with cutting-edge skills essential for the burgeoning semiconductor industry.

PROGRAM HIGHLIGHTS:

In-Depth Theoretical Insights:

Delve into semiconductor fabrication processes, including contamination control, yield optimization, and metrology.

Advanced Topics Exploration:

Gain knowledge in MEMS, power electronics, advanced packaging, and cleanroom operations.

Expert-Led Training:

Learn from esteemed CeNSE faculty and industry experts.

WHO SHOULD APPLY:

Industry Professionals: Enhance your expertise and stay ahead in the semiconductor sector.

Academicians and Researchers: Deepen your understanding and contribute to cutting-edge research in semiconductor technologies.
